

To our Community of Israel Supporters:

We are coordinating a grassroots effort, based in South Florida, to purchase and ship basic supplies needed by IDF reservists in the field. The two of us teamed up when we were introduced by activist/philanthropist Lisa Bardin, the wife of Noam Bardin, Post.news founder and former Waze CEO.

The Challenge:

The Israeli government is overwhelmed, given that 360,000 reservists have been called up following the horrific events of 10/07/2023. Their protective equipment needs are not being met.

The Solution:

We are collecting the needed supplies, packing them into duffel bags, and flying them from Miami to Israel with El Al passengers multiple times per week. When the planes land, IDF-connected Israelis use their network of drivers to deliver the duffels to military bases. So far, more than 1,000 bags have reached IDF soldiers within two days of leaving Miami International Airport.

How Can You Help?

- Purchase basic supplies (such as gloves, socks, backpacks and rain gear) on our [Amazon Wish List](#). After adding items to your cart, choose “Jacquie” on the shipping page.
- We work with base commanders, tank commanders and commando units to regularly update the Wish List and ensure it is tailored to their needs.

Your assistance is truly invaluable. Thank you for caring and providing your support for Israel. Please share this with everyone you know and feel free to contact us with any questions. Am Yisrael Chai!

B'Shalom,
